

# **Nexa3D Partners with 3DZ to Enter the Southern European 3D Printing Market**

***Ultrafast stereolithography 3D printer continues to expand its global reseller network throughout Europe delivering greater design agility and supply chain resiliency***

**Ventura, CA, May 18, 2020** -- Nexa3D, the maker of ultra-fast stereolithography production 3D printers, announced today a reseller partnership with 3DZ Group, southern Europe's largest additive manufacturing value-added reseller – providing products from top-tier brands like 3D Systems, HP, Markforged, Formlabs, Artec and Materialise, along with training, maintenance, and on-demand 3D printing to blue-chip clients across Europe and around the world. For several years, 3DZ has offered consultancy and services in the additive manufacturing industry, achieving a leading position in EMEA to offer the distribution and application of high precision 3D printing and scanning solutions.

To learn more about the NXE400, see the [media kit](#) and to see it in action [watch this video](#).

*“We’re very excited to make Nexa3D available to our rapidly expanding customer base in our territories,”* said Alberto Ferlin, EMEA Director of Sales at 3DZ. *“Nexa3D empowers us to offer a very compelling design agility and supply chain resiliency solution in a past Covid-19 period in which we believe that super-fast large-format additive manufacturing together with high performance, high temperature durable photopolymers will be highly prized by our customers.”*

Nexa3D's rapid global reseller network expansion is part of the company's ambitious plan to deliver a significant speed and productivity upgrade for the tens of thousands of legacy stereolithography printer users by delivering ultra-fast industrial printers at an attractive cost of ownership. Combined with its high-performance polymers, Nexa3D helping its customers become more agile throughout their design and manufacturing cycle by reducing the time to produce functional prototypes and production parts from hours to just minutes. The company's flagship NXE400 takes current 3D printing speeds from dialup internet to broadband breaking both the speed and productivity barriers at scale with the ability to print up to 19 liters of parts in a single build.

*“It is full speed ahead for us at Nexa3D as we continue to expand our global reseller network, and we’re honored to partner with a company of vision, reach and proven performance like 3DZ,”* said Avi Reichental, Executive Chairman & CEO of Nexa3D. *“Manufacturers are adapting processes to become much more agile in their design and resilient in their supply chain in the face of changing circumstances. We believe that our products are at the heart of enabling customers to make that adjustment by converting current 3D printing speeds from dialup internet to broadband-like productivity. We’re very excited to build together with 3DZ the future of design agility and supply chain resiliency for the benefit our mutual customers.”*

3DZ is an authorized dealer of 3D printers and 3D scanners for some of the world's most prestigious brands including HP, 3D Systems and Formlabs. The company is the leading reseller of additive manufacturing products for Spain, Italy, France, Serbia, Romania, and Dubai, serving segment leading customers including ST Microelectronics, global water pump leader Pedrollo, cosmetics packaging maker Toly, and house construction company Kapriol.

### **About Nexa3D**

Nexa3D makes ultrafast industrial-grade stereolithography 3D printers and high-performance polymers affordable for professionals and businesses of all sizes. The company's printers are powered by proprietary Lubricant Sublayer Photo-curing (LSPc) technology and patented structured light matrix capable of reaching top speeds and industrial productivity, drastically reducing 3D printing cycles of precision functional parts from hours to minutes. ### **About 3DZ**

3DZ is an authorized dealer of the most world's most prestigious additive manufacturing brands, offering 3D printers suitable for every need, from domestic use to industrial production. 3DZ delivers the best combination of technologies, deep industry knowledge and a flexible range of solutions that unleash the full potential of 3D printing and scanning. Complementing this are top-tier certified training and consultancy services and on-demand 3D printing from custom manufactured rapid prototypes to low-volume production plastic and metal parts. For more information, please visit [www.3dz.com.mt](http://www.3dz.com.mt).
